In our quest to satisfying our amiable customers, wouldn't it be great to give our customers great satisfaction while we generate more revenues?

Here is to why CI/CD is that one thing to make us all happy!

→

Security is an important aspect of making sure our values to our highly esteemed customers are not compromised, CI/CD allows us to detect security vulnerabilities more easily thereby allowing us to avoid cost.

CI CD allows for our developers to be able to deploy resources more easily thereby leading to generating more revenue because they will have time to create new values-generating resources which will be released frequently

→

CI CD allows for less errors in getting our values to high-esteemed customers as there will be much lesser failure in our quest to satisfying our customers giving us the advantages of reducing cost in our quest of satisfying our amiable customers ⟶

CI CD allows us to automate most important steps in getting our values to our esteemed customers reducing the total cost to be spent if these values are to be rendered manually
